Summary

Full-Stack Android Developer skilled in **Java & Dart** focused on building simple, reliable, and user-friendly Android apps. I work on both app design and backend features, including APIs, Firebase, databases, and authentication.

Skills

Programming Language: Java, Dart Python, C

Tools: Android Studio

Database: Firebase, SQLite, RoomDatabase

Projects

HealthPal - Doctor Appointment App | Flutter, Dart, Figma ([Link](#))

April 2026

- Developed a pixel-perfect Doctor Appointment mobile UI using Flutter, replicating a Figma design system with high accuracy.
- Designed and implemented end-to-end UI flows including onboarding, authentication, home, doctor listing, booking, and profile screens.

Sahayak: Disaster Detection and Management System | Android, Java ([Link](#))

Aug 2024 – Jan 2025

- Developed Sahayak, a smart disaster detection and management platform for real-time monitoring, planning, and rapid rescue coordination.
- Implemented deep learning-based disaster detection models achieving 98% accuracy for early identification of disaster events.
- Enabled real-time alerts and action-oriented tools to help users respond immediately during emergencies.
- Designed a user-friendly system that connects affected people with nearby rescue teams for faster response and improved disaster preparedness.

SalesPoint: Ecommerce Android App | Android, Java ([Link](#))

June 2025 – Oct 2025

- Designed and developed an Android-based e-commerce application as a freelance project with a clean, user-friendly UI.
- Implemented dynamic product listings with real-time updates and category-based browsing.
- Integrated Wishlist functionality to allow users to save and manage favorite products.
- Used Firebase for backend services, enabling real-time data synchronization and secure data storage.

Finance Tracker | Android, Java ([Link](#))

April 2025 – June 2025

- Designed and built a personal finance tracker app as a freelance project with an intuitive and user-friendly interface.
- Enabled users to log income and expense transactions and categorize spending efficiently.
- Implemented visualizations to help users analyze spending patterns and track financial habits.
- Integrated Firebase to manage budgets, store data securely, and sync user data in real time.

Awards & Certifications

- Native Mobile App Development
- 2nd Rank In Mobile App Development Competition
- PU Code Hackathon 2.0
- Smart India Hackathon 4.0
- Smart India Hackathon 5.0
